Sandhill's Featured Digital Antenna

The Winegard MS-2002 MetroStar Antenna providing excellent reception, picking up signals from all direction continuously without adjustment. No rotator system needed. Its built-in preamplifier increases the strength and clarity of digital signals. The MetroStar's preamplifier boosts signal strength up to 6 times the received signal on VHF and 9 times on UHF. The antenna's UV protected housing is fabricated from impact-resistant filled co-polymer, making the exterior extremely resistant to weathering and color change. The MetroStar is ideal for houses, mobile homes, apartments, and offices.

***Features of the
Winegard MetroStar
Features include:***

- Built-in preamplifier to boost signal strength
